# WELCOME

## Dear Colleagues and Participants,

It is with great pleasure to welcome you to the Austrian-Swiss Metabolic Meeting (ASMM) 2024, held in the picturesque city of Innsbruck. As we gather in this beautiful alpine setting, we embark on a journey to explore and advance the realms of “Sustainable Structures in Inherited Metabolic Medicine.” The ASMM promises to be a hub of innovative ideas, insightful discussions, and collaborative networking, all aimed at shaping the future of metabolic medicine.

Inherited metabolic disorders pose unique challenges that require not only cutting-edge scientific knowledge but also sustainable and holistic approaches. With a focus on sustainable structures, we aim to foster an environment where clinicians, researchers, and experts from diverse disciplines can come together to share their expertise, exchange valuable insights, and collectively pave the way toward groundbreaking advancements in the field.

Over the course of two days, ASMM 2024 will feature a lineup of distinguished speakers who are at the forefront of metabolic medicine. Topics will range from novel diagnostic techniques and therapeutic interventions to patient-centered care. Through interactive sessions, panel discussions, and workshops, we will uncover new ways to integrate sustainability in metabolic medicine, ensuring the well-being of both current and future generations. Along with the sessions, you will also have the opportunity to establish lasting collaborations and engage in thought-provoking conversations.

Once again, welcome to ASMM 2024! We eagerly await your presence, your contributions, and the collective impact we will create together.

See you in Innsbruck!

Warm regards,
